## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, 10-13 drawn to spot size converter device, classified in class 385 subclass 43.
- II. Claims 5-9 drawn to method of manufacturing including wet and dry etching classified in class 438, subclass 22.

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, e.g., laser ablation.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I restriction for examination purposes as indicated is proper.
